

Akka Technical Account Manager

Your very own “Akkatect in residence”

Work with an Akka Technical Account Manager (TAM) just once and you’ll always want one by your side. A TAM takes on the role of player-coach accelerating adoption of Akka inside your organization. Enabling teams from design to production and throughout production operations, your TAM significantly increases your team productivity and project success.

The value

Your Akka TAM helps your team design, develop, and operate a high-performance, scalable solution and assist in rapidly resolving blockers that may stand in the way of an on-time launch. Simply, your TAM ensures teams are equipped for project success.

Accelerate development velocity

- Architecture review
- Plan validation for design, development, testing, deployment, monitoring and scaling your project
- Adoption & implementation expertise
- Issue management

Increase project quality

- Sustained focus on continuous improvement
